

# Thanks for a Great 2015!

This was a year full of new experiences and new beginnings.  
Thanks to all of you who made it all possible. **Happy Holidays!**

Jeffrey Daymont, [www.daymont.com](http://www.daymont.com)

The **Science of Juggling Show** saw new horizons this year, teaching the laws of motion to school aged kids far beyond the borders of California. I did my first tour of the Lone Star state in spring and my fall tour of the east coast included the eastern-most school of the USA!

(Calais, ME).

2015 also saw the premier of the **Scarecrow Juggling Show**. The farm-to-table story is illustrated by juggling routines with farm tools and produce. The grand finale juggling trick even represents all five food groups!

This summer, Disney's imagineers created a parade to celebrate the release of Pixar's "**Inside Out**". I joined a cast of talented dancers and puppeteers for a daily parade through Disney's California Adventure. We juggled and passed "memory balls" between us throughout the parade route.

This year also marks the beginning of "**Juggler's Gallery**". I took advantage of the time I had off the road to create a series of art pieces for jugglers and fans of juggling. These original pieces are available for purchase at: [ETSY.com/shop/JugglersGallery](http://ETSY.com/shop/JugglersGallery)

## See you in 2016!
